

Get to know the SpotOn system

The SpotOn system is far more than a means of producing a legal register - its real value lies in the reduction in environmental and business risk, and the peace of mind that it offers.

Benefits

Features

Easy to use

Using SpotOn is easy and intuitive to use and the search facilities enable you to find precisely what you need to know. First read the plain English explanations and then access the relevant sections of the legislation with the click of a mouse.

Peace of mind

Contravening the law may result in huge financial and reputational risks. A SpotOn subscription buys peace of mind because you know that a team of experts are monitoring changes in legislation, notifying you and updating your system so that you always have access to the correct information about your organization's legal responsibilities and risks.

Saves time and money

The initial set-up costs are soon recovered through lower recurrent costs. Internal and external audits can be done faster and cheaper, we can keep you updated for a fraction of what it would cost your organization to do it yourself and if you don't understand anything a specialist lawyer will explain it to you for free!

Reduces business risk

SpotOn dramatically reduces the very significant risks associated with non-compliance. Users can identify what they need to do to be compliant before they act. The organization can use the compliance management tools to identify what it must do to achieve compliance and to track the implementation of compliance measures.

Educates staff

Ignorance of the law is one of the main causes of non-compliance. SpotOn users soon gain a good understanding of how to comply with the legal and other requirements that apply to them. SpotOn also enables an organization to prove that it has complied with its legal duty to take reasonable measures to educate its staff about their HSE responsibilities.

Protects staff from personal liability

SpotOn gives the directors, managers and employees of an organization the knowledge and tools they need to protect themselves from being held personally liable for breaches of environmental laws by the organization.
